Cyber Resilience Training for Directors

Is your board prepared to review a cyber resilience strategy?

○○○○○

Boards have a fiduciary responsibility to preserve financial value, the privacy of customer data and their company's reputation. Recent massive data breaches were a rude awakening for many boards.

This has elevated cyber resilience from an operational task to a board room priority. To ensure effective cyber risk oversight, many boards invest in developing new practices, changing board room procedures - and acquiring additional knowledge.

All directors should share in the debate!

Most directors bring a knowledge domain other than technology to a board. But all directors should be part of the debate about cyber risk. Our research shows that only 21% of directors are satisfied with how responsibility for technology is shared across the board. The critical nature of cyber risks demands for decision making to become more inclusive!

Gain unique board room insights!

This training has been developed by directors, for directors. Our team has board room experience and is familiar with overseeing cyber risk. We speak the language of the board room. You won't hear technology lingo from us!

How to generate Digital Trust?

Trust is fundamental to any business, no matter the sector. Digital trust is created when sound ethics are combined with cyber resilience. This one-day learning experience for directors will be a cornerstone for your cyber resilience efforts.

Participants will learn about recent cyber-attacks and how they impact businesses. A look at new technologies like AI, allows to see how the cyber risk landscape is evolving. Using real-life case studies, we will explore risk mitigation. We will discuss how cyber risk deliberations impact board meetings and the board's committees. An approach to monitoring cyber resilience continuously will conclude the training.

This course will boost director's confidence:

○ To understand the current cyber risk landscape,

○ Review the responsibilities of the board and its committees for effective oversight of cyber risks.

○ Discuss the elements of a Cyber Resilience Strategy and the steps towards its implementation,

○ Appreciate the importance of monitoring and incident management,

○ Assess how best to work with the executive management and when to rely on external expertise.

Strengthen your cyber risk oversight. Call us:
